

## ART. RobSet 3 - STUNNING DEVICE

IN COMPLIANCE WITH  
**EC**  
REGULATIONS ON  
ANIMAL SLAUGHTERING

### Special features

A functional, efficient and practical electronic instrument which stunning tongs are connected to for electronarcosis of pigs and sheep.

#### The important features of RobSet 3:

- The most advanced design and production technologies currently available.
- Exceptionally efficient, safe and practical to operate.
- Safety guaranteed by compliance with CEI regulations during the production of each and every component.
- Quick stunning with minimum energy use: 220 V - 130 VA.
- The animal is stunned long enough for sticking and complete exsanguination, even of large pigs.
- Absolutely no residual blood remains in the animal's tissues.
- No damage to organs or tissues.
- Current leakage is entirely prevented by an exclusive isolation transformer.
- Electrical power is fully concentrated on the temples of the animal being stunned.
- The highest levels of operator safety.
